Ok, the only one I am familiar with is SH Bell. I don't know enough about the other three to make a call on them.

The article mentions 4 facilities. I thought I'd ask in case there were other places potentially responsible that are still operating and could be subject to RCRA. They don't have to have a RCRA permit, but if they released hazardous waste, they should have had a permit.

Joe

Not sure, is SH Bell even a RCRA facility?

Hi—

Is there any need for RCRA Corrective Action to be involved?

Thanks,

Joe

While investigating manganese pollution in yards of Southeast Side residents, EPA finds even worse problem:
lead

11/23/2018

Chicago Tribune Online

2018-11-23 Federal authorities discovered another toxic legacy while searching for contaminated yards near a Southeast Side company cited for violating clean air laws. Crews dispatched to the East Side neighborhood by the U.S. Environmental Protection...
